WILD HOG
TRAP.**

How Pig Brig Traps Catch Pigs.

Set Up the Trap

Using T-posts or trees, build the trap where you see signs of pig activity.

Trapping tips and tricks.

Trap Setup

If using T-posts instead of trees, be sure they are 6.5 to 7 ft. Shorter posts will not work. Test ground anchors by pulling aggressively. They should stay firmly seated when pulled.

Conditioning Mode

Initially, spread bait inside and outside the trap. Get the pigs used to feeling the raised net (12-15 in off the ground) on their backs. Don't shoot at them, run dogs in the areas or feed them anywhere else.

Capture Mode

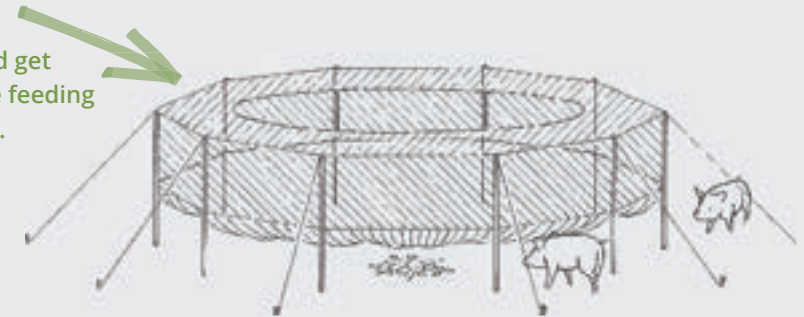

Make sure the hooked cam straps are super tight and all the corn is in the center of the trap. If the site is muddy, toss straw or hay wherever the net will touch the ground.

Removal

Approach the trap calmly and let the pigs tire themselves out before euthanizing or trailering for relocation.

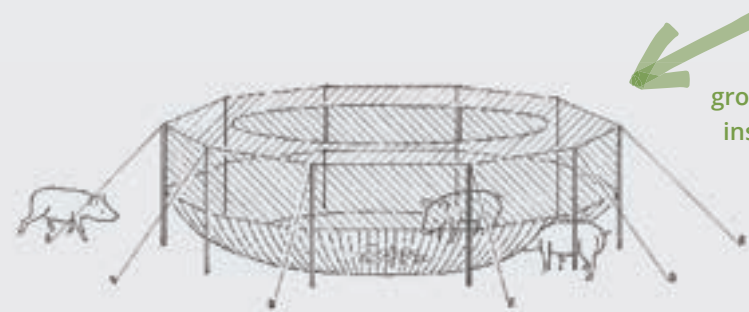

Bait Your Site

Put your bait out and get the pigs comfortable feeding under the raised net.

Set Your Trap

Lower the net to the ground. The pigs will root inside but not be able to root back out.

Owners Love It. Pigs, Not So Much.

★★★★★ John G. - Eufaula, AL

"334 pigs in 13 months with one trap. Incredible. Lightweight, easy to use and simple for one person to set and maintain."

★★★★★ Lori S. - Monticello, AR

"They won't be destroying our crops this spring! Strong, durable, and it works!"

★★★★★ Richard D. - Grovetown, GA

"I've deployed the Pig Brig twice so far and caught 23 pigs the first time and 22 the second time. I love the 'continuous catch' that this trap allows."

★★★★★ Curran S. - Hoisington, KS

"Very useful tool for us to trap pigs in remote areas."

"What's different about the Pig Brig? Because it's **non-mechanical**, it's **less expensive** and it's **easier to transport and set up**. It's also **extremely effective** at catching hogs, as we've found."

— Lindsay Thomas Jr., National Deer Association

**READY FOR THE LAST
PIG TRAP YOU WILL
EVER NEED?**

Pig Brig® Trap Systems

The design is as ingenious as its components are simple. Sturdy netting that stands up to even the biggest, most aggressive boars, along with heavy duty hardware to hold it all together make up our efficient, effective, all-in-one patented trap.

What's included?

Base Net

A 20-ft diameter base net with a dynamic drop strength of more than 8,000-ft-lbs as well as a vinyl-coated easy pull cable seam that makes opening and closing your trap a piece of cake.

Boar Shield

A heavy-duty, double wall of net that keeps big boars inside.

Hardware Kit

This kit includes everything you need to set the net: 2-ft ground anchors, ground anchor driver, anchor stakes, double-hooked cam straps, T-post mounts and zip ties. T-posts are not included. If you use trees, you may not need them.

Trap Cap (Optional)

A 2-ft-wide trap cap—that can be clipped or sewn in—covers approximately 30% of the net opening, keeping jumpers where they belong: inside the trap.

For all of the incredible things the Pig Brig Trap can do, its development came about largely because of the things we couldn't do. Or, more specifically, weren't allowed to do.

Working on a feral hog eradication project on the Pacific Island of Guam, our biologists were forbidden from driving posts into the ground or any work that would disrupt the soil due to unexploded WWII ordnance.

It was these restrictions that resulted in the Pig Brig's breakthrough design.

When we started hanging nets from trees, we realized that, thanks to the pigs' natural rooting behavior, the animals would continuously enter the trap unimpeded. And by not relying on a remotely triggered gate, our catch numbers were much higher than they had been with traditional metal traps.

Just like that, Pig Brig Trap Systems was born: a simpler, smarter, more effective way to trap feral pigs. And we continue to push the design, features and functionality of the Pig Brig Trap, learning from our customers and delivering new products and new solutions.

We can't wait to hear how well it works for you.

Happy trapping!

Vickie & Tony DeNicola

When we were forced to take "no" for an answer, something magical happened.

Frequently asked questions.

What kind of warranty do you offer?

For all valid warranty claims, we will either repair or replace the defect. If we can't do either of those, we'll be happy to offer a full refund.

How many people does it take to set it up?

One will do it. In less than an hour, one person can have the trap completely set up without having to beg friends and family to help.

Where can I use it?

Wherever the pigs are. With no rigid walls to contend with, you can deploy the Pig Brig Trap anywhere, including uneven ground, hillsides and wooded areas.

What kind of customer support can I expect?

We're real live humans and we're here to help. We stand with you and behind our name with all the real-time, personal support you need.

Does it hold big pigs?

The Pig Brig Trap will catch and hold the largest hogs out there. We've consistently handled boars weighing in around 400-lbs, for more than 12 hours with no problems at all.

How many pigs can it hold?

Our largest catch is 65 in one trap! Even though the trap can catch and hold big numbers, we sometimes recommend using two when dealing with multiple social groups or lone boars that dominate a single site.

100-Day Return Policy

We have confidence that you'll succeed, and want you to have confidence in your purchase. If you don't love it, don't worry - we'll make it right.

Real Live Humans, Here to Help

We're always here to answer your questions and address any problems with real-time, real personal customer service.

SO SIMPLE, IT'S GENIUS.

Easy to Transport

Lightweight, fits in a tote and easily goes everywhere the pigs go.

Catches the Whole Sounder

Not a one-shot gate trigger, but a true multi-catch system allowing wild hogs to continuously enter.

One Person Set Up

Single person set up in less than an hour without any extra help from friends and family.

Stronger Than Steel

Double-walled, UV-protected, 8,000-ft-lb drop strength netting stands up to even the biggest boars.

Trap Anywhere

No gate means there are no moving parts and no cell service is needed.

Smarter Than Smart Traps

With no slamming gate or metal walls, our stealthy trap won't cause panic or create trap-shy pigs.

The Pig Brig® Trap is the **most effective way to defend** your land and livestock **from feral hog damage, period.**
